ABOUT ME

BS-MS student in AI and Data Science at IIT Patna with a strong focus on cybersecurity, system security, and software development. Actively involved in technical problem solving, full-stack web applications, and event coordination, bringing both practical coding skills and strong team management experience.

EDUCATION

Bachelor of Science and Master of Science (BS-MS) in Artificial Intelligence and Data Science
Indian Institute of Technology Patna (IIT Patna) | 2025 – 2030

TECHNICAL SKILLS

- **Cybersecurity & Tools:** Kali Linux, Ethical Hacking Foundations, Cryptographic Hashing, Linux Security.
- **Programming & Web Stack:** Python, JavaScript, React.js, Node.js, Express.js, MongoDB, Tailwind CSS.
- **Languages:** Hindi, English.

KEY PROJECTS

CyberShield AI
Developed a hackathon MVP frontend cybersecurity command center for detecting digital fraud, scam messages, phishing URLs, and email threats. Built with React, Vite, and Tailwind CSS, featuring threat score visualization and red flag detection panels.

FloodGuard Kisan (Progressive Web App)
Built a smart PWP to help farmers handle climate and weather uncertainties, featuring local data alerts and smooth mobile accessibility.

Campus Genie
Engineered an interactive campus assistant platform to streamline student navigation, data retrieval, and academic workflows.
